**Summary Report for Individual Task  
113-571-1022  
Perform Voice Communications  
Status: Approved**

---

DISTRIBUTION RESTRICTION: Distribution authorized to U.S. Government agencies only.

DESTRUCTION NOTICE: Destroy by any method that will prevent disclosure of contents or reconstruction of the document

**Condition:** Given: 1. One operational radio set for each net member, warmed up and set to the net frequency. 2. A call sign information card (5 x 8) consisting of: Net member duty position (S-1, S-2), net call sign (letter-number-letter), suffix list (Net Control Station [NCS] - 46, S-1 - 39, S-2 - 13), and a message to be transmitted. 3. Situation: The net is considered to be secure and authentication is not required. 4. FM 24-18. Note: This task may have as many net members as there is equipment available. Each net member must have a different suffix and message to transmit. Some iterations of this task should be performed in MOPP.

**Standard:** Enter a radio net, send a message, and leave a radio net using the proper call signs, call sign sequence, prowords, and phonetic alphabet and numerals with 100 percent accuracy.

**Special Condition:** None

**Special Standards:** None

**Special Equipment:** None

## Performance Steps

### 1. Enter the net.

- a. Determine the abbreviated call sign and answering sequence for your duty position.
- b. Respond to the NCS issuing a net call (figure 1).
- c. Answer in alphanumeric sequence.

Note: At this time, the NCS acknowledges and the net is open.

### 2. Send a message.

- a. Listen to make sure the net is clear. Do not interrupt any ongoing communications.
- b. Call the NCS and tell the operator the priority of the message you have for his or her station.
- c. Receive a response from the NCS that he or she is ready to receive.
- d. Send your message using the correct prowords and pronunciation of letters and numbers. (See tables 2 through 5 and figure 2.)
- e. Get a receipt for the message.

### 3. Leave the net in alphanumeric sequence.

Note: The NCS acknowledges and the net is closed. Note: The following call signs are used in this task as an example: Net call sign - E3E, NCS - E46, S-1 - E39, S-2 - E13.

- a. Answer in alphanumeric sequence.
- b. You receive a call from the NCS who issues a close down order (figure 3).

(Asterisks indicates a leader performance step.)

**Evaluation Preparation:** Setup: Position operational radio sets in different rooms or tents or at least 70 feet apart outside. Obtain call signs, suffixes, and a radio frequency through the normal command chain. Select a message 15-25 words in length, containing some number groups such as map coordinates and times. Print the call signs for the sender and the receiver, along with the message to be sent, on 5 x 8 cards. Perform a communications check to ensure operation of the radios. Have an assistant who is proficient in radio operation man the NCS. Provide the assistant with the call signs. If the soldier has not demonstrated sufficient progress to complete the task within 5 minutes, give him or her a NO-GO. This time limit is an administrative requirement, not a doctrinal one; so if the soldier has almost completed the task correctly, you may decide to allow him or her to finish.

**Brief Soldier:** Give the soldier to be tested the card containing the message and call signs. Tell him or her the radio is ready for operation, the net is considered to be secure and authentication is not required, and to send the message to the NCS and get a receipt. Tell the soldier, if sufficient progress in completing the task within 5 minutes has not been demonstrated, he or she will receive a NO-GO for the task.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. Entered the net in alphanumeric sequence.			
2. Sent a message of 15 to 25 words using the correct prowords and phonetic alphabet and numerals.			
3. Left the net in alphanumeric sequence.

**Environment:** Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects.

**Safety:** In a training environment, leaders must perform a risk assessment in accordance with FM 5-19, Composite Risk Management. Leaders will complete a DA Form 7566 COMPOSITE RISK MANAGEMENT WORKSHEET during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, NBC Protection, FM 3-11.5, CBRN Decontamination. Everyone is responsible for safety. A thorough risk assessment must be completed prior to every mission or operation.
